SUMMARY:

Passionate and innovative Frontend Developer skilled in crafting dynamic web projects that showcase my creativity and technical expertise. Driven by a love for coding and design, eager to contribute to cutting-edge projects while expanding my skillset in a professional environment.

SKILLS:

- Languages: HTML, CSS, SCSS, JavaScript
- Libraries and Frameworks: ReactJS, Tailwind, Redux, Framer Motion
- Tools: VS Code, Vite, Git / Github

RELEVANT PROJECTS:

Resume Parser And Ranker

- Developed an application to automatically parse and rank resumes based on job descriptions, enhancing recruitment efficiency and accuracy.
- Built the UI with ReactJS, managed the backend with Django, stored datas in SQLite and utilized spaCy NER and a weighted sum algorithm for ranking.
- Streamlined the resume screening process, reducing manual effort, leading to more effective and efficient hiring decisions.

Text-To-Image Generation

- Created an application for generating images from textual descriptions.
- Utilized a pretrained Stable Diffusion model to transform textual inputs into detailed images.
- Improved creative workflows by offering a tool for rapid and accurate visualization of ideas from text.

Currency Exchange Rate Converter

- Developed a user-friendly currency exchange rate converter providing real-time and accurate exchange rates.
- Used React for the UI and integrated Spline for enhanced visual design, making the application visually appealing.
- Improved user experience by incorporating the ExchangeRate API, offering an efficient tool for up-to-date currency conversion.

EDUCATION:

IOE , Tribhuvan University 2019 - 2024
Bachelor in Computer Engineering

New Horizon College 2017 - 2019
Physics, Chemistry, Math
